

Calla Lily with Bow

This calla lily can be used for various occasions, thus I left off any sentiment from the pattern, although it was originally designed for a sympathy card.

Supplies:

Parchment paper

White pencil

PCA Fine straight grid (optional)

Ribbon (your choice of color)

Ruler

Card stock

Directions:

Place parchment paper over pattern and trace the image and border with white pencil, and your choice of sentiment. Emboss the flowers, leaves, stems and bow using the full range of embossing tools. Emboss the border with the small ball tool and ruler.

Perforate the slots (I used the PCA Fine straight grid to keep my perforations straight and even);

Perforate around the border;

Cut out slots; thread your choice of ribbon through the slots.

Cut out around the border and attach to your choice of card stock (I sewed the card together along the spine using invisible thread)
